

Interfaz del sistema

```
graph TD; I[Interfaz del sistema] -.-> R[Recibir información de la interfaz]; R -.-> H[HW del sistema]; H -.-> E[Enviar información a la interfaz]; E -.-> I;
```

The diagram illustrates the communication flow between three main components: the system interface, the communication layer, and the system hardware. The interface is at the top, the communication layer is in the middle, and the hardware is at the bottom. Arrows indicate the direction of information flow: from the interface to the communication layer, from the communication layer to the hardware, from the hardware back to the communication layer, and from the communication layer back to the interface.
